Title: (ENG) NITROGEN MONOXIDE PRODUCTION INHIBITOR

Abstract: (ENG)

PROBLEM TO BE SOLVED: To obtain a nitrogen monoxide production inhibitor that is useful for occlusive cerebrovascular disorder and the like with side-effect reduced by extraction-treating the plant that has been used as a legendary herb in Indonesia.

SOLUTION: A compound represented by formula I (R1 and R2 are each H or a 1-6C alkyl) or formula II (R3 is H or a residue of monosaccharide) or their salts or their hydrates is used as an active ingredient. The compound represented by formula I bearing methyl groups as R1 and R2 is new and is isolated from the body of a plant called Kaya secang in Indonesia (Caesalpinia sappan) by solvent extraction and the like. The compound of formula II where the R3 is a glucose residue is also obtained from a plant called Sambi boto in Indonesia (Andrographis paniculata) by the extraction from the plant body with a solvent or the like.
